DETAILED ACTION

1. The indicated allowability of claim 25 is withdrawn in view of the newly discovered reference(s) to Kramer, Corsover and/or Scuero. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 25 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kramer (5,269,624) in view of Scuero (6,619,879).

Kramer discloses a method of sealing two surfaces with a sealing member. The member 40 has an attachment portion 42/44 fixed to one of the surfaces and a seal portion having a deformable segment (82, 96, or 69). The deformable segment is positioned fully within a receiving aperture defined by surfaces 26, 28, and 12. Filler 34 is then filled in the area between the deformable segment and surfaces 28 and 26. Kramer does not disclose a coating. Scuero teaches a method of sealing two surfaces using a sealing member. Scuero teaches using a membrane 13 continuously across the sealing member and surfaces to waterproof the joint. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the membrane taught by Scuero to waterproof the joint and further seal the joint.

Allowable Subject Matter

4. Claims 27, 29, 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 1-3, 5, 9-14, 26, and 31-37 are allowed.

Response to Arguments

6. Applicant's arguments with respect to claim 25 have been considered but are moot in view of the new ground(s) of rejection.

Scuero and Corsover teach using continuous coatings across expansion joint seals.
